ALTERNATIVE METHODS IN THE PRODUCTION PROCESS OF INDEPENDENT NARRATIVE
FILMS : A DESCRIPTIVE ANALYTIC APPROACH

This study describes and analyzes different aspects of the production process for the independent feature film in the United States. Financing is the main problem facing a producer of an independent film. A producer with an outstanding package of literary property, star, director, and a good reputation may easily find a major distributor who agrees to finance the project. The distributor will finance the approved budget for the project. The financing can be through the distributor's own money or upon his guarantee to a bank that the money will be returned with interest. Other sources for financing an independent film involve: independent production companies with studio agreements, the specialists, foreign financing, limited partnership, network television, pay television and cable television.

There are three distribution routes available to the independent producer: the majors, the independent distributors, and four-wallling. The majors grant the independent producer prestige and unlimited resources. The majors handle virtually all the big budget films and have the greatest power which enables them to obtain the best theatres at the best times of the year. The independent distributors are very diverse, ranging from one-person operations to large companies that are similar in structure to the majors (mini majors). "Four-wallling" is the term for renting of theatres for a flat weekly fee. The rental fee includes all house expenses. The producer will also pay for all advertising and keep all box office gross.

The ancillary markets are very important to the independent producer and distributor, as they often provide a significant percentage for a film's total revenue. To an independent, the revenues from the ancillary markets can mean profit and the ability to produce or distribute additional films.

Gaga Communications Wins Y10bn Credit Line From 8 Banks

Japan: Eight banks give Y 10 bn loans to Gaga

Nikkei Net Interactive (ATM) 09 Nov 2001 NihonKeizai Shimbun Online

Language: ENGLISH

In Japan, a group of eight banks, led by Bank of Tokyo-Mitsubishi has granted Y 10 bn worth of credit line to Gaga Communications Inc (Gaga) <a major film distributor>. The members of the group are Hiroshima Bank , Juroku Bank Ltd, Mitsubishi Trust & Banking Corp, Industrial Bank of Japan, Shinsei Bank , Sanwa Bank and Dai-Ichi Kangyo Bank . The banks have inked an annually renewable loan agreement with Gaga, enabling the firm to cut down its outstanding debt and flexibly use funds for purposes like acquisitions of film rights. Meanwhile, Gaga is planning to enhance its service of Internet-based broadband transmission of short films as well as to raise the number of films for distribution.

Deutsche Banken geben Grosskredit an russische Gazprom
RUSSIA: GERMAN MONEY AND KNOW-HOW FOR GAZPROM
Frankfurter Allgemeine Zeitung (FA) 30 Sep 1994 p.23
Language: GERMAN

A German consortium of banks, including Dresdner Bank and Bayerische Hypotheken- und Wechsel-Bank, have granted a credit worth DM 936mn for erection of a gas/chemicals processing plant to Russian RAO Gazprom. The interest rate is in line with the Fidor rate plus a surcharge and is adjusted every half-year. The credit is 95% backed by a Hermes guarantee. Based on the credit and own funds worth DM 1.5bn, Gazprom is to erect the gas/chemicals building in Novy Urengoi between 1995 and 1998. Participants in the Siberian project are German BASF, Salzgitter and Linde. The building block for processing of Russian natural gas is to include a stream cracking plant with gas separation facility and a polyethylene plant. The gas separation plant is to supply ethane, 1.5mn cu.m of natural gas (for Western Europe) and 300,000 tons of natural gas condensates annually. The stream cracking plant produces ethylene from ethane. Based on a BASF method, 300,000 tpy of LDPE are to be produced from polyethylene, to be used in production of injection moulded parts as well as films for nonfood and food articles for Russia. Gazprom is Russia's biggest foreign exchange supplier and is to repay the credit after construction within 4 and a half years.

Five more record companies invest in Sony affiliate
JAPAN: FRESH CAPITAL FOR LABEL GATE BY 5 FIRMS
Nikkei Net Interactive (ATM) 02 Mar 2001 NikkeiIndustrial Daily online
Language: ENGLISH

Label Gate Co, a Japanese music distribution company which is also an
affiliate of Sony Corp, has been injected with fresh capital by another
five investors including Nippon Columbia Co, Victor Entertainment Inc,
Senha & Co, Extasy Japan Co and Teichiku Entertainment Inc, all of which
are recording firms. With the participation of the five in Label Gate,
the music distributor currently has 16 recording firms as shareholders
with their combined stake accounted for 60%. Meanwhile, the balancing 40%
stake are held by Sony Communication Network Corp. Capital investment
made by the five new shareholders saw Label Gate's capital jumped to Y 167
mn on 28 February 2001 from Y 100 mn. The capital tie-up forged between the
five companies and Label Gate entails distribution facilities of the latter
to be used by the five investors for online music sales.

A CACOPHONY OF NEW TECHNOLOGIES

JAPAN - A CACOPHONY OF NEW TECHNOLOGIES
Financial Times (C) 1991 (FT) 31 May 1991 p13

Japan: this article looks in detail at the industry response to mini discs and digital cassettes, which are competing for audio enthusiasts' approval. Until this month (05.91) it looked as if Sony of Japan's effort to introduce Digital Audio Tape to complement the compact disc had failed.

Record companies seemed to prefer a different recording system, Digital Compact Cassette, which Philips, the Dutch electronics giant, plans to introduce next year. Sony has now hit back with another music technology. Its recently-announced Mini Disc system plays a miniaturised version of the CD, with the added advantage that it can also record music. Philips says its new system has the backing of most of the world's big music companies, including PolyGram, EMI, Bertelsmann and Warner. Sony says it has solved the CD's vibration problems by including a memory chip in the Mini Disc player. Because the Mini Disc can record as well as play, it poses a threat to DCC. Analysts in Japan are divided over the Mini Disc's prospects. Mr Barry Dargan at James Capel says that while Sony contigues to lead in the introduction of new products, some of them have had limited success, but Ms Naoko Matsumoto at S G Warburg Securities thinks the disc is going to be a huge market. There are no signs yet of record companies defecting from DCC, but the position of equipment makers could be decisive. (Abstract. Copyright The Financial Times Limited 1991)**

The Eigen value decomposition of defined matrix is determined to obtain a matrix of Eigen vectors. The risk measures are evaluated using Eigen vectors and P transformation matrix.|

AB- <BASIC> DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for the following:

- (1) system for evaluating portfolio risk measures;
- (2) computer-readable recording medium storing program for evaluating portfolio risk measures;
- (3) method for determining allocation of securities in portfolio;
- (4) system for determining allocation of securities in portfolio;
- (5) computer-readable recording medium storing program for determining allocation of securities in portfolio;
- (6) method for determining efficient frontier;
- (7) system for determining efficient frontier; and
- (8) computer-readable recording medium storing program for determining efficient frontier.

USE - For evaluating portfolio risk measures of financial instruments such as investment security e.g. bonds or stocks and insurance products such as life insurance policy and guarantee investment contracts .

ADVANTAGE - Enables determining the optimal multifactor and multi-objective portfolio risk measures of the financial instruments reliably and easily.

DESCRIPTION OF DRAWING(S) - The figure shows a block diagram of the system for analytic-based multifactor multi-objective portfolio risk

optimization.

AB- PROBLEM TO BE SOLVED: To prevent an investment opportunity for a
customer from being missed by omission of confirmation in
establishment of an agreement, and to enhance operability. SOLUTION:
This financial commodity ordering system has a setting part 504 for
correlating other order to the first order, a credit confirmation
part 508 for credit-confirming the other order, a storage part 503
for storing respective correlated orders, an order placing part 506
for ordering the first order to a securities exchange, and a
scheduled order ordering part 505 for ordering the other order
correlated to the first placed order to the securities exchange
when the agreement for the first ordered order is settled. The
setting part 504 correlates the other order to the first order, when
the credit is determined not to get short. COPYRIGHT: (C)2004,JPO

HSBC Holdings Name Bond Chairman in a Broad Shake-Up

HONG KONG: APPOINTMENTS AT HSBC AND SUBSIDIARY

Wall Street Journal Europe (WSJ) 13 Oct 1997 p.13

Language: ENGLISH

John Bond has been appointed successor to Sir William Purves as chairman for the Hong Kong division of HSBC Holdings <UK>, the banking and financial services group. Mr Bond, at present chief executive, is expected to pursue the group's current global diversification programme. Following a poor performance and reduction in market share for Hang Seng Bank Ltd, HSBC's 61% owned subsidiary, the chief executive of Hongkong & Shanghai Banking Corp., David Eldon, has been named non-executive chairman and will succeed Sir Q.W. Lee, who retires at the end of 1997, in a move which increases HSBC's control over the local bank. Recording disappointing growth and a GBt 40mn loss from an underwriting agreement earlier in 1997, HSBC Investment Bank will appoint Stephen Green, treasurer to the HSBC group as chairman, following the retirement of Bernard Asher on 28 February, 1998.
